

1 Hero Section

Your strategic India hub - designed and delivered with confidence.

Sub-headline:

From first hire to scalable capability - we remove the execution risks that stall GCCs.

Primary CTA:

Start Your GCC Journey

Secondary CTA:

2 Why India? Why Now?

(Short data-driven strip under hero)

India is the global hub for transformation-ready talent.

- ✓ ~1,800 GCCs across India
 - ✓ ~2 million skilled professionals in GCCs
 - ✓ 58% investing in AI/data-led innovation
- Source: Zinnov & EY 2024–25

But success is not guaranteed.

Most new GCCs **struggle to scale value - not headcount.**

3 The Real Challenge

Execution - Not Strategy - is the Critical Barrier

Companies see the opportunity.
Few navigate the execution gap.

What Leaders Expect

What Usually Goes Wrong

Cost savings + talent access

Attrition, mis-hiring, poor location choices

Full control of capability

Governance breakdown

Strategic value delivery

Stuck in transactional mode

Result: A stalled GCC that never gains credibility.

The barrier to building in India isn't strategy - it's trusted execution.

4 What We Do

Execution-Led GCC Design & Scale Model

Step	What We Deliver	Value to You
1. Strategic Validation	Talent, mandate, location blueprint	Low-risk start
2. Entity & Setup Support	Legal, compliance, governance	First-day readiness
3. Talent & Capability Build	Start small, scale smart	Quality + retention
4. Digital Delivery Enablement	Data, BI, supply chain, finance, product	Early business impact
5. Scale & Leadership Transition	Culture, innovation roadmap	Long-term success

Build proof before you build headcount.

5 Why Us

We've built GCCs from the inside — now we help you build yours.

- ✓ Decades of experience scaling India delivery for global enterprises
 - ✓ Deep credibility across Finance, Supply Chain, Tech, Digital
 - ✓ Pay-as-you-scale model - no big consulting overhead
 - ✓ Tier-II sourcing strategy reduces cost and boosts retention
 - ✓ We own the delivery - not just the deck

Operators, not consultants.

6 Experience That Matters

(Case Study Cards)

Manufacturing & Diversified Enterprises

Scaled India hub to **2,500+ roles**
Delivered **USD 150M+ annual impact**

Technology & Product Enterprise

Built **command center for parts & inventory planning**
Improved SLA + planning intelligence

Global 500 F&A / Supply Chain Transitions

Accelerated **zero-to-steady-state** delivery
Enabled transformation-ready operations

The common thread:
We build value-driven teams — not staffing centers.

7 Where We Create Impact

(Services mini-grid)

- **GCC Strategy & Setup**
- **Data & Analytics Delivery**
- **Automation & Process Intelligence**
- **Supply Chain & Finance Enablement**
- **Leadership Alignment & Governance Design**
- **Tier-II Talent Strategy & Scaling**

From first 10 hires → to future innovation hub

8 Who We Work With

CFO | COO | CHRO | CTO

Global enterprises planning **10 - 50** roles in India

Early-stage, confidential entry or scale-up mode

Organizations seeking **value creation** - not body-shopping

Small enough to start fast.

Strong enough to scale intelligently.

9 Start with a Low-Commitment Discovery

Begin with a 2-4 week advisory sprint

- Clarify mandate
- Build business case
- Identify India roadmap
- Estimate cost & timeline

Pay by the hour.

No long-term lock-ins.

No expensive consulting army.

Home page structure (exploded to problem, solution and evidence/case study)

Structure -

Hero section

Heading ("Trusted by Global enterprise to build high performing GCC in India") Why this ? - shows other's confidence in our company, why they trust us and what we provide them with.

[Need to show them who trust and partnered with us their logos]

Or

Option 2 ("We build high-performing India GCCs for global enterprises.") No need to add any logos

Subheading (Examples

Option 1 - " We partner with global leaders to design, build and scale India GCCs using proven location strategy, talent models, and digital delivery frameworks."

Option 2- "From city selection to operating model design, we help enterprises build India hubs that deliver faster scaling, lower costs, and real digital impact"

Option3- "We guide organizations through the full GCC journey—strategy, setup, and scaling—ensuring India operations become engines of innovation and cost advantage."

Option 4- "Your end-to-end partner for launching and scaling high-value India GCCs with speed, clarity, and precision."

[I prefer option 1, it has the Authority and outcome driven]]

CTA

"Start Your GCC Blueprint"

Problem with original

To generic and lacked authority (Consulting firm needs to have that authority and confidence which will convince the CEO,CFO and VPs to trust the organization)

Problem they are facing (What we do section starts from here but i have divided it into 3 parts 1 - Problem, 2 - Solution and 3 - Real case study/ testimony on how and what we did what impact did this created for our client)

They must be facing some problem (directly addressing the problem and speaking to them without marketing fluff)

“Why Global Enterprises Struggle With India GCCs” - this statement will evoke that human nature to seek answers for their problems, Natural hook

What will happen if their problem isn't resolved properly (The stats are just for conveying the idea we have to use real data for this as it's a B2B site)

- Wrong city selection increases cost by 28%
- Talent strategy misalignment reduces retention by 40%
- Poor operation model - Slows scaling (Avg 12-18 months delay)
- Lack of digital capability - GCC cost center, not innovation drive

This will make them realise there are a lot to lose if they don't take the right decision on time { **Dark pattern -1** }

(We already got the reader in the right state of mind to sell them the solution they are seeking)

Solution (What service provide)

But simply stating what are we offering will not convince them they need to see value on how things will happen without spilling the beans (Progressive discloser)

End to end GCC advisory

India Playbook what worked in the past, what is working and how will we make it work

- Location, talent and operating model design
- Digital delivery frame works
- 90 - Days Launch Model (Fastest in class) something which others are not offering

On ground execution in India

Actual execution muscle, not PowerPoint.

- Real estate and partner access
- Tier - 2 expertise
- Local Hiring network

Technology forward Delivery

Every stage is backed by data & automation.

- Bi dashboards
- Ai based capability modeling
- Automation setup across functions

Did our solution worked ? (Naturally occurring question for which we don't want them to wait or seek answer else were we will provide them with a solid evidence on what were the outcomes and how much did it benefited our client)

We will provide them the overview of the summary of our case studies

(Example - Case Study 1 — Fortune 100 Retailer

We designed & launched their India GCC in 110 days.

Result: 300-member digital & analytics hub delivering 22% lower cost-to-serve.

)

If i can go through actual case study i can improve it even more

Our GCC Playbook (Our Process)

5 step GCC Playbook

- Intent and Fit mapping
- City Intelligence and location strategy
- Talent and operating model Architecture
- Digital enablement and capability buildout
- Scale, Governance and optimization

This section will be in a bento graph grid with animation which will force them to read it (IMP section of the site)

Final prompting them to take action and hit the CTA

Prompt

Ready to build an India GCC that actually performs?

CTA

Let's architect your blueprint.
